RONDA PRO

PROFESSIONAL
FILTRATION

FILTRATION CATEGORY

AstralPool takes residential pool filters one step further with its range of Ronda Pro filters.

Their new features deliver advantages that set them apart in terms of ease of installation and maintenance. Exclusive, modern filters with a high level of quality and reliability.

RAPID INSTALLATION

Easy to handle, lightweight and with built-in handles that make it convenient to handle and move around.

The Pro valve does not require gluing to fit it, so this reduces its assembly time and avoids having to wait for it to dry. The selector valve is included and is protected by the filter's packaging.

EASY MAINTENANCE

Its new drainage system makes it **40% faster** than previous models.

The **whole of its interior is accessible**, thus making filter medium maintenance more straightforward and faster.

The glycerin-filled pressure gage gives highly **accurate readings**. It also includes a restriction indicator that can be adjusted for each pool for optimum filter cleaning.

PREMIUM QUALITY

The **new reinforced design** of the base and the technical materials used throughout deliver **unbeatable resistance**.

Pressure drops are reduced by 15% thanks to the new valve that provides **greater hydraulic efficiency**.

Comes with a **5-year warranty** for the tank and 3 years for the rest of the components.

The Ronda Pro filter has been designed and **made in Europe**. A reliable filter for residential pools.
