

SOLAR COLLECTOR - LUX 800

HIGH PERFORMANCE | GREENHOUSE EFFECT | EASY HANDLING AND MAINTENANCE

This type of heater is suitable for all kinds of swimming pools with sand filtration, both above-ground pools and in-ground pools. The solar heater stands out due to its high performance—thanks to the materials used and modern production technology.

The base of the solar heater is a reinforced heating plate embedded in a self-supporting structure. The entire heater is covered with a 3 mm thick transparent polycarbonate plate, which creates a greenhouse effect, thereby increasing the heating performance. The dimensions of the solar heater allow it to be easily moved to another location or stored for the winter after being emptied. The Lux 800 solar heater is equipped with feet, allowing it to be optimally oriented towards the sun, thus enhancing its performance.

The solar heater raises the pool water temperature by up to 6°C without the need for expensive energy sources. Thanks to the solar heater, you can extend your swimming season by several weeks and enjoy uninterrupted water fun much longer than with other heaters. The Lux 800 solar heater is the ideal choice for efficient water heating in your swimming pool or elsewhere in the garden.

With the connection kit, you can connect multiple solar collectors to the circulation system between the pool and the sand filter, achieving even higher efficiency in water heating.

FocusFlow technology with lateral suction.

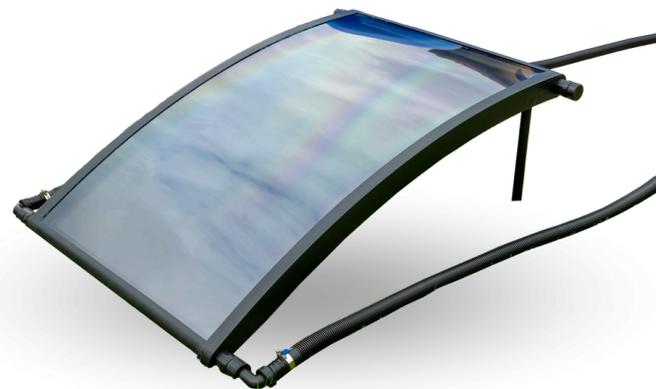

The cleaning performance is improved by targeted suction power, which vacuums the sides and the bottom.

Large basket for collecting mechanical debris
with handles for easy removal.

Replaceable and washable filter

Transparent lid for easy inspection of the filter basket.

Exclusive swivel and anti-tangling mechanism
for the cable

Prevents cable tangling.

Logistic data

Item no.	3EXX0259
Dimension	120 x 80cm / 0,8 m ²
Packing	80 x 122,5 x 16,5 cm / 8,5 kg
Quantity on palette	13 pcs/plt

Package contents:

- 1x Solar panel
- 2x Support legs
- 1x Accessory set

Recommended accessories

Kit for serial connection of panels
